14. (Currently Amended) A method for a host to provide known data about an entity to a third party pursuant to said entity's authorization, comprising the steps of:

providing a means for said entity to identify said host to contact for access to restricted information and for said third party to recognize said entity as a member of a service of said host;

responsive to said recognition, said host receiving a request from said third party for specific information about said entity;
said host surveying at least one data repository for said specific information about said entity;

said host displaying said specific information about said entity to said entity and requesting authorization from said entity to provide at least a portion of said specific information to said third party; and
responsive to an opting in of said entity, said host providing at least a portion of said specific information to said third party.
